Revised 2021 December
Collection Summary
Title: Tissandier Collection on the History of Aeronautics
Inclusive Dates: 1539-1929
Bulk Dates: 1780-1920
ID No.: MSS42994
Creator: Tissandier, Gaston, 1843-1899
Creator: Tissandier, Albert, 1839-1906
Creator: Tissandier, Paul, b. 1881
Creator: Dupuis-Delcourt, 1802-1864
Extent: 8,000 items
Extent: 27 containers plus 17 oversize
Extent: 14 linear feet
Language: Collection material in French with some material in English, German, Italian, Russian, and Spanish
Location: Manuscript Division, Library of Congress, Washington, D.C.
LC Catalog record: https://lccn.loc.gov/mms79042994
Summary: Collection of items gathered by Gaston Tissandier, an aeronaut and scientist, with additions by his brother, Albert Tissandier, an artist and aeronaut, and his son, Paul Tissandier, also an aeronaut. Includes the collection of J. F. Dupuis-Delcourt, an airship builder, brought together prior to 1860 and later purchased by Gaston Tissandier. Mostly in French, the collection pertains primarily to balloon flights of the eighteenth and nineteenth centuries, but also includes material concerning early heavier-than-air flight and the aeronautical career of Gaston and Albert Tissandier as well as art work of Albert Tissandier.
Online Content: Part of the Tissandier Collection on the History of Aeronautics is available on the Library of Congress Web site at https://hdl.loc.gov/loc.mss/collmss.ms000118. To promote preservation of the originals, researchers are required to consult the online edition as available.

Selected Search Terms
The following terms have been used to index the description of this collection in the LC Catalog. They are grouped by name of person or organization, by subject or location, and by occupation and listed alphabetically.

Titles
Tissandier Collection on the History of Aeronautics at the Library of Congress

Occupations
Aeronauts.

Acquisition Information
The Tissandier Collection on the History of Aeronautics was purchased by the Library of Congress in 1930.

Processing History
The Tissandier Collection was organized and described in 1962. It was reorganized and a new register created in 2004.

Additional Guides

Transfers
Some photographs and graphic material have been transferred to the Library's Prints and Photographs Division where they are identified as “Visual materials from the Tissandier Collection.” Digitized images of most of these items are available through the Prints and Photographs online catalog. Some books were transferred to the Rare Book and Special Collections Division where they are identified as a part of this collection.
Copyright Status

It is the researcher's responsibility to determine requirements of domestic copyright laws and international treaties and conventions.

Access and Restrictions

The Tissandier Collection is open to research. Researchers are advised to contact the Manuscript Reading Room prior to visiting. Many collections are stored off-site and advance notice is needed to retrieve these items for research use.

Online Content

Part of the Tissandier Collection on the History of Aeronautics is available on the Library of Congress Web site at https://hdl.loc.gov/loc.mss/collmss.ms000118. To promote preservation of the originals, researchers are required to consult the online edition as available.

Preferred Citation

Researchers wishing to cite this collection should include the following information: Container number, Tissandier Collection on the History of Aeronautics, Manuscript Division, Library of Congress, Washington, D.C.

**Scope and Content Note**

The Tissandier Collection on the History of Aeronautics spans the years 1539-1929, with the bulk of the material dating from 1780 to 1920. The collection includes correspondence, graphic material, photographs, writings, printed matter, and scrapbooks pertaining primarily to balloon flights of the eighteenth and nineteenth centuries. Also included are material relevant to early heavier-than-air flight and the aeronautic careers of Gaston Tissandier (1843-1899) and Albert Tissandier (1839-1906) as well as art work of Albert Tissandier. The papers are mainly in French with some in English, German, Italian, Russian, and Spanish. The collection is organized in the following series: *Aeronauts*, *Correspondence*, *Writings by Gaston Tissandier*, *Scrapbooks*, *Dupuis-Delcourt File*, and a *Miscellany* consisting of printed matter and newspaper clippings, extracts and notes on aeronautics, graphic material, and photographs.

Gaston Tissandier, scientist, aeronaut, dirigible builder, and aeronautical historian, is responsible for collecting the bulk of this material. The work of his brother, Albert Tissandier, a graphic artist who participated in and made illustrations of many of Gaston's aeronautical projects, is also well represented in the collection. Gaston Tissandier's son, Paul, a noted aeronaut and aviator in his own right, added to the collection during the first decades of the twentieth century. The *Dupuis-Delcourt File*, originally an independent collection gathered prior to 1860 by J. F. Dupuis-Delcourt * (1802-1864), aeronaut, balloon builder, author, and promoter of aeronautical projects, was acquired by Gaston Tissandier.

* Dupuis-Delcourt's name is usually given as “Jules François” but sometimes as “Jean François.”

The *Aeronauts* series consists of files on individual aeronauts holding items collected by Gaston Tissandier, but also including items transferred by Tissandier from the *Dupuis-Delcourt collection*. The series contains correspondence, printed matter, newspaper clippings, handbills, broadsides, manuscripts, photographs, technical drawings, and miscellany such as balloon fragments. Pioneering aeronauts and airship builders from the first century of flight are particularly well represented. Included are files on Salomon August Andrée, Francesco Arban, Jean-August Pierre Blanchard, Madame Blanchard, Octave Chanute, Jacques Alexandre César Charles, Nicholas Jacques Conté, Barthélemy Faujas de St.-Fond, André Jacques Garnerin, Henri Giffard, Charles Green, Robert Holland, François Lhoste, Vincent Lunardi, Jean Margat, Jacques-Etienne and Joseph-Michel Montgolfier, Jean-François Pilâtre de Rozier, E. G. Robertson, Augusto Severo, Orville and Wilbur Wright, Gabriel Yon, and Francesco Zambeccari.

The files contain material on numerous balloon and dirigible flights. Accounts of the first balloon flights, the first fatal balloon accident, the first English Channel crossing by balloon, the first flight of a woman, the first dirigible flights, and other 'firsts' are included, as are important aerial milestones such as flights by Gay-Lussac for the purpose of conducting scientific experiments and André's arctic balloon expedition, as well as disasters such as the explosion and crash of Severo's dirigible, *Pax*. Benjamin Franklin, American ambassador to Paris at the time, is represented by letters containing his observations on the first manned balloon ascents. There is also a letter from Antoine Laurent Lavoisier inviting Jacques Alexandre César Charles to participate in an experiment demonstrating the decomposition of water and the production of hydrogen. Individuals may appear in both this file and the *Dupuis-Delcourt File*.

The *Correspondence* series contains miscellaneous correspondence of both Gaston and Paul Tissandier, primarily received correspondence.

The *Writings by Gaston Tissandier* series holds published articles and drafts by Tissandier. Most of the writings concern aeronautics, but they also include articles on chemistry and atmospheric dust. Gaston Tissandier served as editor for the journal *La nature*, and a scrapbook of his frequent contributions to that journal is in this series.
The Scrapbooks series contains material on various aeronautical topics. Of special interest are four volumes on the Siege of Paris and the role of balloonists during the Franco-Prussian War. The aeronautical careers of Gaston and Albert Tissandier are documented in several of the scrapbooks.

The Dupuis-Delcourt File contains what remains of J. F. Dupuis-Delcourt's collection after items in the original collection were incorporated into the Tissandier Aeronaut series by Gaston or Paul Tissandier. The bulk of the file dates from 1783 to 1863 and contains printed matter, newspaper clippings, drawings, engravings, posters, handbills, and balloon fragments. About half of the file is devoted to individual aeronauts. The remainder consists of accounts of ordinary and extraordinary balloon flights, practical and fantastical designs for and attempts at aerial navigation, advertisements and tickets for balloon flights, correspondence, material pertaining to the Société Aéronautique et Météorologique, and writings by Dupuis-Delcourt. The file features many of the same aeronauts as the Tissandier Aeronaut series. For many years Dupuis-Delcourt served as secretary and archivist of the Société Aéronautique et Météorologique, and his personal relationships with many of the leading aeronauts is evidenced in his correspondence. He cooperated with E. G. Robertson on many balloon flights, and the file contains a large volume of their correspondence. The turbulent political climate in France during the period is represented by political posters from the 1848 Revolution and the ascent of Louis Napoleon, 1851-1852.

**Organization of the Papers**

The collection is arranged in seven series:

- Aeronauts, 1539-1923
- Correspondence, 1868-1913
- Writings by Gaston Tissandier, 1864-1901
- Miscellany, 1782-1929
- Scrapbooks, 1833-1914
- Dupuis-Delcourt File, 1783-1863
- Oversize, 1803-1889
