Related Material

The Manuscript Division's [Tissandier Collection](#) of early aeronautic material includes other items pertaining to Giffard and his captive balloon exhibition of 1878.

Copyright Status

It is the researcher's responsibility to determine requirements of domestic copyright laws and international treaties and conventions

Access and Restrictions

The papers of Henri Giffard are open to research. Researchers are advised to contact the Manuscript Reading Room prior to visiting. Many collections are stored off-site and advance notice is needed to retrieve these items for research use.

Preferred Citation

Researchers wishing to cite this collection should include the following information: Container number, Henri Giffard Papers, Manuscript Division, Library of Congress, Washington, D.C.

Scope and Content Note

The papers of Henri Jacques Giffard (1825-1882) span the years 1852-1910 and contain correspondence, notes, design drawings, broadsides, newspapers, printed illustrations, articles about Giffard, and clippings. Giffard was a pioneer in the design of airships and is recognized by many as having devised the first steam-powered steerable airship in 1852. This collection of papers focuses primarily on his activities associated with the large captive balloon he exhibited in the courtyard of the Tuileries in Paris in 1878. Also included are Giffard's holograph notes on hydrogen gas and his design drawings for balloons. The material is in French.

Arrangement of the Papers

This collection is arranged alphabetically by type of material and chronologically therein.

Container List
