Revised and expanded by Melinda K. Friend with the assistance of Sherralyn McCoy

Finding aid encoded by Library of Congress Manuscript Division, 2016

Collection Summary

Title: Frances Oldham Kelsey Papers

Span Dates: 1890-2016

Bulk Dates: (bulk 1950-2000)

ID No.: MSS84006

Creator: Kelsey, Frances Oldham, 1914-2015

Extent: 78,000 items;

Extent: 253 containers plus 4 oversize;

Extent: 101.4 linear feet; 103 digital files (3.7MB)

Language: Collection material in English

Location: Manuscript Division, Library of Congress, Washington, D.C.

LC Catalog record: <https://lccn.loc.gov/mm97084006>

Summary: Pharmacologist and government official. Correspondence, memoranda, research files, subject file, biographical material, laboratory notebooks and notes, reports and studies, academic material, press releases and clippings, speeches, statements, testimonies, articles and other writings, memorabilia, printed matter, financial records, family and estate papers, reminiscences, card indexes, patient files and records, photographs, microfiche, digital files, and other papers chronicling Kelsey's career as a pharmacologist and instructor at the University of Chicago in Illinois and the University of South Dakota in Vermillion, and as a regulator investigating new drugs at the United States Food and Drug Administration.

Selected Search Terms

The following terms have been used to index the description of this collection in the LC Catalog. They are grouped by name of person or organization, by subject or location, and by occupation and listed alphabetically.

Public officials.

Provenance

The papers of Frances Oldham Kelsey, pharmacologist and government official, were transferred to the Library of Congress in 1997 by the United States Food and Drug Administration under the instructions of Kelsey. Two later editions were transferred from the United States Food and Drug Administration by John Patrick Swann in 2003. Additions from Kelsey's daughters, Susan Duffield and Christine Kelsey, were received in 2012 and 2016.

Processing History

The papers of Frances Oldham Kelsey were arranged and described in 1998. The finding aid was revised in 2009. Additional material received between 2003 and 2016 was processed as Part II in 2016.

Transfers

Items have been transferred from the Manuscript Division to other custodial divisions of the Library. Sound recordings and a DVD have been transferred to the Motion Picture, Broadcasting, and Recorded Sound Division. Some photographs have been transferred to the Prints and Photographs Division. All transfers are identified in these divisions as part of the Frances Oldham Kelsey Papers.

Copyright Status

Copyright in the unpublished writings of Frances Oldham Kelsey in these papers and in other collections of papers in the custody of the Library of Congress has been dedicated to the public.

Access and Restrictions

Restrictions apply governing the use, photoduplication, or publication of items in this collection. Consult reference staff in the Manuscript Division for information concerning these restrictions. In addition, many collections are stored off-site and advance notice is needed to retrieve these items for research use.

Digital Format

Digital files were received as part of the papers of Frances Oldham Kelsey. Reference copies were created from the original digital media. Advanced notice is required for access to digital content; consult reference staff in the Manuscript Division for more information.

Preferred Citation

Researchers wishing to cite this collection should include the following information: Container number or digital ID number, Frances Oldham Kelsey Papers, Manuscript Division, Library of Congress, Washington, D.C.

Biographical Note

Date	Event
1914, July 24	Born, Cobble Hill, Vancouver Island, British Columbia, Canada
1934	B.Sc., McGill University, Montreal, Quebec, Canada
1935	M.Sc., McGill University, Montreal, Quebec, Canada
1938	Ph.D., Pharmacology, University of Chicago, Chicago, Ill.
1938-1950	Instructor, University of Chicago, Chicago, Ill., conducting advanced research in pharmacology; assistant professor, 1946-1950
circa 1941-circa 1946	Civilian, Office of Scientific Research and Development, Malaria Research Program, conducting studies related to the chemotherapy of malaria
1943	Married Fremont Ellis Kelsey (died 1966)
1947	Published with F. E. Kelsey and E. M. K. Geiling <i>Essentials of Pharmacology</i> . Philadelphia: Lippincott; 2nd edition, 1951; 3rd edition, 1955; 4th edition, 1960
1950	M.D., University of Chicago, Chicago, Ill.
1950-1952	Editorial associate, <i>Journal of the American Medical Association</i> , American Medical Association, Chicago, Ill.
1953-1954	Intern, Sacred Heart Hospital, Yankton, S. Dak.
1954-1957	Associate professor of pharmacology, University of South Dakota, Vermillion, S. Dak. Recipient, Lederle Medical Faculty Award
1956	Became a United States citizen
1957-1960	Private medical practice, Vermillion, S. Dak.
1960-1963	Medical officer, Bureau of Medicine, United States Food and Drug Administration
1962	Recipient, President's Award for Distinguished Federal Civilian Service for refusal to approve commercial distribution of thalidomide in the United States
1963-1966	Medical officer, Investigational Drug Branch, Division of New Drugs, Bureau of Medicine, United States Food and Drug Administration
1965	Inducted into National Women's Hall of Fame, New York World's Fair, New York, N.Y.
1966-1967	Director, Division of Oncology and Radiopharmaceutical Drug Products, Office of New Drugs, Bureau of Medicine, United States Food and Drug Administration
1967-1968	Assistant to the director for Scientific Investigations, Bureau of Medicine, United States Food and Drug Administration
1968-1971	Director, Division of Scientific Investigations, Office of Medical Support, Bureau of Medicine, United States Food and Drug Administration
1971-1977	Director, Scientific Investigations Staff, Office of Scientific Evaluation, Bureau of Drugs, United States Food and Drug Administration
1977-1982	Director, Division of Scientific Investigations, Office of Scientific Evaluation, Bureau of Drugs, United States Food and Drug Administration
1982-1987	Director, Division of Scientific Investigations, Office of Compliance, Center for Drugs and Biologics, United States Food and Drug Administration
1987-1995	Director, Division of Scientific Investigations, Office of Compliance, Center for Drug Evaluation and Research, United States Food and Drug Administration
1995-200?	Deputy for Scientific and Medical Affairs, United States Food and Drug Administration
2000	Inducted into National Women's Hall of Fame, Seneca Falls, N.Y.
2005	Retired from United States Food and Drug Administration
2010	Recipient, first Drug Safety Excellence Award, United States Food and Drug Administration; award renamed The Dr. Frances O. Kelsey Drug Safety Excellence Award
2014	Moved to London, Ontario, Canada
2015	Named to the Order of Canada
2015, Aug. 7	Died, London, Ontario, Canada

Scope and Content Note

Introduction

The papers of Frances Oldham Kelsey (1914-2015) span the years 1890-2016, with the bulk of the items concentrated between 1950 and 2000. The collection consists of two parts. Part I covers Kelsey's career as a pharmacologist and government official at the United States Food and Drug Administration (FDA), primarily from 1960 to 1990. Part II comprises the bulk of the collection and documents Kelsey's career in pharmacology before and during her years at the FDA. Further descriptions of each part follow. Excisions of information from some of the documents in the collection were carried out by the FDA.

Part I

Part I of the papers spans the years 1913-1998, with the bulk of the items concentrated in the period between 1960 and 1990. Part I includes Kelsey's files created during her work as a pharmacologist and government official at the FDA and consists of three series: [Office File](#), [Speeches and Writings File](#), and [Research File](#). Included in the papers are biographical material, correspondence, memoranda, speeches, editorials, background information and chapter drafts for a book, reports and statements, studies, press releases, newspaper and magazine clippings, reprints of articles, proceedings of hearings, research files, and other material pertaining to Kelsey's career as a researcher and regulator of investigational new drugs at the FDA.

The [Office File](#) consists of general correspondence and other material of an administrative nature documenting Kelsey's activities at the FDA primarily during the 1960s. The file of biographical material in particular contains information regarding Kelsey's receipt of the President's Award for Distinguished Federal Civilian Service in 1962 for her refusal to approve the commercial distribution of thalidomide in the United States. Following the thalidomide controversy, Kelsey was much sought after as a public speaker. Correspondence regarding invitations to speak documents her numerous engagements. Kelsey's work as an investigator is reflected by her office memoranda and by memoranda for the record which summarize her participation in conferences, interviews, telephone conversations, and other interactions. Detailed trip reports chronicle her participation in national and international conferences on pharmacology and related fields.

The historical file in the series consists of photocopies of memoranda written between 1994 and 1997 by Kelsey during the process of transferring her files to John Patrick Swann, historian at the FDA, where the collection was originally housed. Scattered throughout the papers attached to the respective item or items described, the original memoranda range in length from a sentence to three pages and describe single items as well as whole batches of material. By bringing the photocopies of the memoranda together into one location, the historical file constitutes a collection of Kelsey's reflections on her long career at the FDA. It provides valuable information on current scientific research and development, the discovery of new drugs and therapies and their effects, prominent individuals in the field, controversies within the pharmaceutical industry as well as the FDA, and day-to-day issues encountered at the workplace.

The [Speeches and Writings File](#) consists primarily of interviews, speeches, background information and chapter drafts for a book, editorials, and articles by others. Kelsey's activity as a public speaker over a thirty-year period is chronicled in the speeches file. During the early 1960s, she frequently spoke on the drug thalidomide. Other topics include promising new cures for diseases, quack remedies, and the tension between the desire of pharmaceutical companies to release new drugs on the market as quickly as possible and the regulatory mechanism of the FDA in demanding stringent drug testing. *Essentials of Pharmacology*, coauthored with E. M. K. Geiling and F. E. Kelsey, her husband, is represented by numerous folders of background information and drafts of chapters eight and nine. The editorials file consists primarily of brief scientific articles written by Kelsey while an editorial associate with the American Medical Association in Chicago during the early 1950s.

The [Research File](#) constitutes the largest section of material in the collection. Many of the files reflect Kelsey's research on various new drugs undergoing the regulatory process for FDA approval, such as Avazyme, Bamfolin, Daroil, Fluorouracil, Librium, Parotin, Ritalin, Triparanol, and Vesprin. Kelsey's participation on numerous committees is also documented. The computerization of scientific information during the early 1960s is reflected in the files on the National Library of Medicine and Arthur D. Little, Inc., regarding its proposal to establish an integrated agency-wide scientific information system. The material on DES (diethylstilbestrol), DMSO (dimethyl sulfoxide), and thalidomide is quite extensive and reflects the considerable attention given these controversial drugs by Kelsey. The subject of quackery appears throughout the Research File. Controversies in the field of new drug research are reflected in the files on Emanuel Revici concerning selenium

diethyl dithiocarbonate (SDD) as a treatment for cancer, on William K. Summers's promotion of tetrahydroaminoacridine (THA) (Tacrine) as a treatment for Alzheimer's disease, and on Henry Turkel's request for approval of "U" series drugs as a treatment for cancer.

Folders under the heading investigational new drugs (INDs) relate to congressional legislation primarily resulting from Senator Estes Kefauver's investigations in the early 1960s. Files on congressional hearings feature the involvement of various congressional committees in reviewing and overseeing the FDA in its capacity as guarantor of the purity and efficacy of the nation's drugs. These files reflect the growing change in public attitude regarding the ethics of drug testing on selected sections of the population who often had little or no control over their involvement in new drug trials which could frequently prove life-threatening. Subject studies in vulnerable populations constitute a large section of material in the series. The testee categories include fetuses, infants, children, geriatrics, prisoners, and women of childbearing potential. The Kelsey Papers also contain numerous reports documenting studies and research which had significant effects upon the drug regulatory process in the United States during the second half of the twentieth century.

Part II

Part II of the papers spans the years 1890-2016, with the bulk of the items concentrated in the period from 1950 to 2000. Part II includes Kelsey's files covering her career in pharmacology before and during her years at the FDA. The papers are organized into the following series: [Correspondence](#), [Personal File](#), [Office File](#), [Speeches and Writings File](#), [Subject File](#), [F. E. Kelsey Files](#), [Oversize](#), and [Digital Files](#)

The [Correspondence](#) contains mostly incoming letters to Kelsey from friends, colleagues, organizations, and the public. Letters sent by friends, who address Kelsey as "Frankie" and her husband as "Ellis," often discuss everyday life, current events, and persons known to both. The largest amount of correspondence relates to thalidomide, with the bulk received in 1962, as the public and others thanked Kelsey for her refusal to approve the commercial distribution of thalidomide in the United States. She continued to receive such letters for the remainder of her career. Further correspondence from friends and colleagues is located in the [Personal File](#).

The [Personal File](#) includes biographical material, family and estate papers, and files kept by Kelsey while at the University of Chicago in Illinois and in South Dakota at the University of South Dakota in Vermillion, the Yankton State Hospital in Yankton, and her private medical practice. The biographical material includes awards and certificates, biographical sketches, curricula vitae, a large file of clippings either about or mentioning Kelsey, and material from her school days in Canada. The family and estate papers include correspondence and other material related to the death of her husband, F. E. Kelsey, and her administration of the estate of her mentor and friend E. M. K. Geiling. Under the tutelage of Geiling at the University of Chicago, Kelsey conducted advanced research in pharmacology, the posterior pituitary, and also worked on a synthetic cure for malaria. The research file, comprised mostly of article reprints involving research on pituitary and thyroid glands, seems to have been kept jointly by Geiling and Kelsey. At the University of South Dakota medical school, Kelsey carried out research involving thyroid disease, radioisotopes, and the relation of thyroid disorders to mental illness.

The [Office File](#) consists of a chronological file and other material of an administrative nature documenting Kelsey's activities at the FDA primarily from 1967 to 2000. The chronological file probably served as a central file and contains copies of outgoing correspondence and memoranda. Unfiled correspondence and memoranda that may have been intended for the chronological file are located in the [Subject File](#) of Part II under miscellany. The historical file created in the [Part I: Office File](#) series was discontinued in Part II with the memoranda kept in place throughout the collection. However, Kelsey's chronological file of some of these memoranda is contained under the heading of John Patrick Swann.

The [Speeches and Writings File](#) consists of interviews, speeches, speaking engagements, background information for a book, articles, editorials, and book reviews. Interviews are interspersed throughout the speaking engagements with the two conducted by the FDA at the beginning of the series. Kelsey's speeches cover many of the same topics found in Part I, but also treat drug laws and legislation, FDA policies and regulations, drug testing on humans, clinical investigators and investigations, good clinical practices, good laboratory practices, and teratogenic drugs and substances that can disturb embryonic or fetal development leading to birth defects or pregnancy termination. Not every folder in the speaking engagements contains a speech. Her articles, some coauthored with F. E. Kelsey, reflect her involvement with research and pharmacology throughout her career. The book reviews, editorials, and the Queries and Minor Notes/Questions and Answers section pertain to Kelsey's years as an editorial associate for the *Journal of the American Medical Association* in Chicago during the 1950s. Files relating to *Essentials of Pharmacology* also appear in Part II with the arrangement of the background information still correlating to different chapters in the book. While again covering chapters 1 through 20,

the files do not contain material for chapters 3, 4, 13, and 14. Additional files, however, include material for chapters 21 through 34. The appearance of later material in the background information indicates that Kelsey continued interfiling into it past the final publication of the book in 1960. It should be noted that many of the chapter topics also appear as topics in the [Subject File](#).

The [Subject File](#) constitutes the largest amount of material in the papers and covers many of the same topics, persons, and organizations found in [Part I: Research File](#) and other series. Kelsey's files as director of the Division of Scientific Investigations at the FDA include the Bioresearch Monitoring Program, clinical evaluations, clinical investigations and investigators, drug laws and legislation, drug testing, FDA policies and regulations, fraud in science, good clinical practices, good laboratory practices, institutional review boards, investigational new drugs, methadone monitoring, new drug applications, radioactive drug research, teratology, and thalidomide. The historical material is comprised of files marked by Kelsey as "mostly historical," but also includes drug legislation, federal regulations, reminiscences about and articles by FDA personnel, clippings, and other material chronicling the history of the FDA. Under the heading of miscellany, the chronological material consists of unfiled correspondence and memoranda that may have been intended for the chronological file in the [Office File](#). Clippings are comprised of unfiled articles probably intended for various topics located in the Subject File and in the [Speeches and Writings File](#) under *Essentials of Pharmacology*. The extensive files on thalidomide contain material dating from the 1960s to the 2000s and include correspondence, studies, articles, clippings, early press coverage of Kelsey, reports, inspections, exhibits, and legal case material including Kelsey's testimony and memorandum.

The [F. E. Kelsey Files](#) were compiled by Kelsey's husband while he worked at the National Institutes of Health in Washington, D.C., and as assistant to the surgeon general. Material under the heading of miscellany is comprised of unfiled items arranged chronologically. Some correspondence, writings, and other material related to F. E. Kelsey is located in the [Personal File](#) under the headings of South Dakota and University of Chicago.

Part II is rounded out by an [Oversize](#) series consisting of awards, certificates, citations, diplomas, card indexes, a menu, a map, memoranda, and a broadside. The [Digital Files](#) contain mostly Kelsey's memoranda to John Patrick Swann, drafts of her performance plans, and the 1995 annual report of the Office of Compliance. There is also a smattering of lists, speeches, notes, forms, article abstracts, correspondence, and writings by Aya Collins.

Arrangement of the Papers

This collection is arranged in two parts and eleven series:

- [Part I: Office File, 1960-1997](#)
- [Part I: Speeches and Writings File, 1913-1993](#)
- [Part I: Research File, 1917-1998](#)
- [Part II: Correspondence, 1932-2015](#)
- [Part II: Personal File, 1890-2016](#)
- [Part II: Office File, 1959-2003](#)
- [Part II: Speeches and Writings File, 1929-2010](#)
- [Part II: Subject File, 1902-2012](#)
- [Part II: F. E. Kelsey Files, 1939-1968](#)
- [Part II: Oversize, 1934-2012](#)
- [Part II: Digital Files, 1991-1997](#)

Description of Series

Container	Series
BOX I:1-I:4	<p><u>Part I: Office File, 1960-1997</u></p> <p>Biographical material, correspondence, memoranda, a file of memoranda for the record describing portions of the collection, and trip reports.</p> <p>Arranged alphabetically by type of material and thereunder chronologically.</p>
BOX I:4-I:10	<p><u>Part I: Speeches and Writings File, 1913-1993</u></p> <p>Interviews, speeches, background information, drafts of a book, editorials, and miscellaneous writings by Kelsey and others.</p> <p>Organized according to authorship by Kelsey or others and thereunder by type of material or file.</p>

BOX II:1-II:13	<p><u>Part II: Correspondence, 1932-2015</u></p> <p>Mostly incoming correspondence, including attachments, from friends, colleagues, organizations, and the public relating to personal and professional activities.</p> <p>Arranged chronologically by date.</p>
BOX II:13-II:41	<p><u>Part II: Personal File, 1890-2016</u></p> <p>Correspondence, biographical information, clippings, awards and diplomas, academic material, memorabilia, patient files and records, laboratory notebooks, estate papers, financial records, research file, printed matter, subject files, card indexes, reminiscences, photographs, and a drawing book and sketches.</p> <p>Arranged alphabetically by name of person or organization, topic, location, or type of material and thereunder alphabetically or chronologically.</p>
BOX II:41-II:57	<p><u>Part II: Office File, 1959-2003</u></p> <p>Correspondence, memoranda, chronological file, financial disclosures, performance plans and appraisals, trip reports, address file, personnel folder, staff lists, and notes.</p> <p>Arranged alphabetically by name of person, type of material, or topic and thereunder alphabetically or chronologically.</p>
BOX II:57-II:95	<p><u>Part II: Speeches and Writings File, 1929-2010</u></p> <p>Correspondence, interviews, speeches, articles, background information for a book, dissertation, editorials, book reviews, illustrations, drafts, page proofs, printed matter, photographs, and miscellaneous writings by Kelsey and others.</p> <p>Organized according to authorship by Kelsey or others and thereunder by type of material or file.</p>
BOX II:95-II:210	<p><u>Part II: Subject File, 1902-2012</u></p> <p>Correspondence, memoranda, reports, statements, studies, proposals, reviews, guidelines, reprints of articles, clippings, press releases, testimonies, minutes, printed matter, and microfiche.</p>

Arranged alphabetically by subject, name of person or organization, or type of material and thereunder chronologically.

BOX II:210-II:218

Part II: F. E. Kelsey Files, 1939-1968

Correspondence, memoranda, subject file, testimony, personal file, writings, reports, grants, surveys, and printed matter.

Arranged alphabetically by type of material or topic and thereunder alphabetically or chronologically.

II:OV 1-II:OV 4

Part II: Oversize, 1934-2012

Awards, certificates, citations, diplomas, card indexes, a menu, a map, memoranda, and a broadside.

Arranged and described according to the series, containers, and folders from which the items were removed.

DF 1

Part II: Digital Files, 1991-1997

Text files consisting of memoranda, performance plans, lists of meetings and speeches, speeches, an annual report, notes, forms, article abstracts, correspondence, and writings by Aya Collins. The material is in WordPerfect document files with one Microsoft Word file. The series comprises 103 files and 3.7 MB of data.

Preserved as received and no arrangement or reorganization of the files occurred.
